01 | Introduction

- 02 | Regional Safety Index Announcement in 2016
- **03** | Evaluation Process
- 04 | Utilization of Regional Safety Index
- 05 | Effects of Regional Safety Index

1. Introduction

Index to evaluate the safety level of local government in 7 sectors* by using various statistics about safety

* 1) Fire, 2) Traffic Accident, 3) Natural Disaster, 4) Crime, 5) Safety Accident, 6) Suicide, 7) Infectious Disease

To reinforce the responsibility of l. g. for safety management by evaluation the safety level objectively and encourage the local government to improve the vulnerable sectors voluntarily

🖕 Legal Basis

Based on Article 66-7, 8 (Public Announcement of Safety Index)* of Framework Act on

the Management of Disasters and Safety

* "The Minister of the Interior and Safety may develop and survey an index that objectively indicates the safety level and safety awareness by area and publicly announce it."

1. Introduction

Sevelopment Background and Principles

3 No Principles to avoid additional working on local government and ensure reliability in developing the index

Ensure that the calculation of Regional Safety Index does become a task of the local government. (No Additional Work)

1st

Make sure that the competence of the evaluator does not influence the judgment of the local government's safety capability.(**No Evaluator**)

The perfunctory safety-related projects, such as those that do not reduce the number of deaths and incidents, should not affect the level of Regional Safety Index. (No Perfunctory Project)

2. Regional Safety Index Announcement in 2016

2nd Official Release in 2016(2016.12.08)

* Parts of 7 Sectors, Fire and Crime

2. Regional Safety Index Announcement in 2016

Reason of Level Change(2015→2016)

Hazard Indicator(Num. of causalities and accidents) is the Major Reason of Level Change

| | | | Upgrading | | | Downgrading | |
|----|--------------------|--------------|-----------------------------------------------|-------|--------------|-----------------------------------------------|-------|
| | Sectors | Num. of L.G. | Num. of L.G. decreased Hazard Indicator | Ratio | Num. of L.G. | Num. of L.G. increased Hazard Indicator | Ratio |
| | Fire | 64 | 63 | 98% | 66 | 58 | 88% |
| | Traffic Accident | 48 | 47 | 98% | 45 | 44 | 98% |
| 50 | Crime | 43 | 41 | 95% | 39 | 33 | 85% |
| | Safety Accident | 52 | 30 | 58% | 48 | 48 | 100% |
| | Suicide | 57 | 56 | 98% | 60 | 57 | 95% |
| ř | Infectious Disaese | 52 | 45 | 87% | 53 | 45 | 85% |
| | Natural Disaster | 57 | 57 | 100% | 70 | 36 | 51% |
| | Average | 53 | 48 | 91% | 54 | 46 | 85% |

2. Regional Safety Index Announcement in 2016

Num. of fire incidents, traffic accidents, and deaths due to suicide decreased and the num. of the fifth violent crimes decreased

| Sectors | Hazard Indicators | 2014 | 2015 | Variation(Ratio) |
|--------------------|--------------------------------------------------|---------|---------|------------------|
| Fire | Num of Deaths | 322 | 249 | ↓73 (22.7%) |
| Fire | Num. of Fires | 41,624 | 43,915 | ↑ 2,291 (5.5%) |
| Traffic Accident | Num. of Deaths | 4,489 | 4,380 | ↓109 (2.4%) |
| Crime | Num. of the Fifth Violent Crimes | 578,334 | 560,813 | ↓17,521 (3.0%) |
| Safety Accident | Num of Deaths | 148,943 | 158,123 | † 9,180 (6.2%) |
| Suicide | Num of Deaths | 13,836 | 13,513 | ↓ 323 (2.3%) |
| Infectious Disaese | Num of Deaths | 2,765 | 2,798 | ↑ 33 (1.2%) |
| Natural Disaster | Result of 'Safety Index for Community Safety' | 0.739 | 0.651 | ↑0.088 (11.9%) |

3. Evaluation Process Statistics related to Safety

| Stat | istics Data B | 260 | | Dep. & Agency | Statistics |

3. Evaluation Process Meaning of Hazard, Vulnerability, and Mitigation Indices

Meaning of Hazard, Vulnerability, and Mitigation Indices

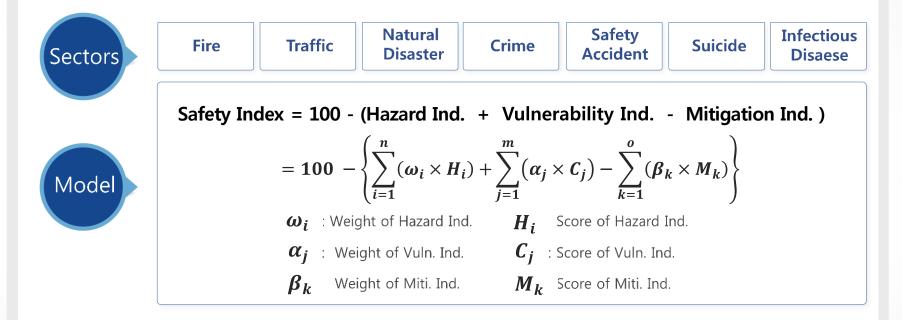

3. Evaluation Process Key Indicators

| | Hazard | Vulnerability | Mitigation |
|-----------------------|---------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|
| Fire | Conversion fatality | Disadvantaged people, Num. of Employees in Restaurants and Bars, Num. of Warehousing and Transportation Companies | Num. of bed hospitals, Financial Independence Ratio, Area of Urban District |
| Traffic Accident | Fatality | Disadvantaged People, Num. of Basic Livelihood Security Recipients, Num. of Business Place Provided Medical Security, Num. of Registered Vehicles | Num. of Medical Institutions, Population Density, Num. of Rescue and Relief Workers |
| Crime | Number of the Fifth Violent Crimes | Num. of Total Incomers, Population density, Num. of Basic Livelihood Security Recipients, Num. of Manufacturing Companies, Num. of Restaurants and Bars | Num. of Police Offices |
| Safety Accident | Number of Occurrence | Area of stream, Area of forest, Disadvantaged people, Num. of Incomers from Other Region, Num. of Employees in Construction Industry, Num. of Employees in Manufacturing | Medical Insurance Premium |
| Suicide | Fatality | Num. of Elderly People, Num. of Naturalized Korean Citizen Caused by Marriage, Num. of Employees in Restaurants and Bars, Num. of Basic Livelihood Security Recipients | Num. of Employees in Health Care and Social Welfare Service |
| Infectious Disaese | Fatality | National Health Service Budgets, Num. of Elderly People, Num. of Basic Livelihood Security Recipients, | Num. of Employees in Health Care and Social Welfare Service, Influenza Vaccination Rate |
| Natural Disaster | I | Result of 'Safety Index for Community | Safety' |

3. Evaluation Process Sectors and Model

Numerical value objectively indicating the safety level of each region (city/province/county/district) by selecting key indicators from safety statistics of national or public agencies(2016 Index was calculated from 2015 statistics)

3. Evaluation Process Natural Disaster Sector

Natural Disaster Sector

 Using the results of 'Safety Index for Community Safety'
 Announced annually for 228 cities/counties/districts based on Countermeasures against Natural Disaster Act Article 75-2

| Division | Safety Index for Community Safety | Way to Conversion |
|-----------------------------------|--------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Score | The lower value means safer | Score : 1-Score at 'Safety Index for Community Safety' Conversion to Final Score(Conversion to Highest Score : 100, Lowest Score : 40) |
| Level | 10 levels | 5 levels |
| Classification by Region Level | No Result by Region Level | Average for Score of Citie(Si)/Countie(Gun)/District(Gu) |

3. Evaluation Process Items and Detailed Indices of Safety Index for Community Safety

| Category | | Indicators |
|---------------------|-----------------------------|--------------------------------------------|
| | Fr | requency of Natural Disaster During Decade |
| Risk | | Scale of Damage |
| Environment (13) | Risk Factor from Natural | Social Risk Factor |
| (13) | Disaster | Geological Risk Factor |
| | | Common Indicators |
| Risk | | River Disaster |
| Management | Risk Factor | Inundation Disaster |
| Capability | from Natural | Slope & Soil Erosion Disaster |
| (16) | Disaster | Seaside Disaster |
| | | Etc. |
| | Pre | vention Performance(18) |

3. Evaluation Process Way to Calculate Safety Index

Safety levels are expressed for each seven Sectors(No Comprehensive Level)

Levels are given by groups, such as metropolitan city, province, city, county, and district, with considering the regional characteristics

> The ratios of levels are considered the standard deviation of city/county/district

| (| Classification | Level 1 | Level 2 | Level 3 | Level 4 | Level 5 |
|-----|-------------------|---------|---------|---------|---------|---------|
| | Ratio | 10% | 25% | 30% | 25% | 10% |
| | MetroPolitan City | 1 | 2 | 2 | 2 | 1 |
| | Do | 1 | 2 | 3 | 2 | 1 |
| Num | Si | 7 | 19 | 22 | 19 | 8 |
| | Gun | 8 | 20 | 25 | 21 | 8 |
| | Gu | 7 | 17 | 21 | 17 | 7 |
